

HIGH TEMP FOOD GRADE DELIVERY CHAIN LUBRICANT

ATL HIGH TEMP FOOD GRADE DELIVERY CHAIN LUBE is an H-1 food grade, high performance synthetic delivery chain lubricant designed especially for baking ovens in the food industry. It will not smoke or carbonize under normal operating conditions and is very resistant to dripping and washout. It provides outstanding protection against wear and rust. It is approved for USDA H-1 (incidental food contact) and fully complies with the requirements of 21 CFR 178.3570.

Excellent for All Baking Ovens
High Viscosity Index
Very Low Volatility
Reduced Downtime
Very Long Fluid Life
Reduced Maintenance Costs

Outstanding Oxidation Stability
High Flash & Auto-Ignition Point
Extremely High Film Strength
Reduced Lubricant Consumption
Excellent Rust Control
Excellent Carbon and Varnish Control

Typical Properties

Lubricant Designation	HTFGDCL
Grade	360
Color	<.5
Pour Point C	-30
Flash Point	260
Viscosity cSt @ 40 C	362
Viscosity cSt @ 100 C	27.3
Cu Strip Corrosion	1a
Maximum Working Temperature C	255
